PROFILE

Backend Engineer specializing in architecting and delivering production-grade PHP/Laravel applications for fintech, ERP, and enterprise clients across India and the Gulf region. Expert in scalable REST API design, secure payment-gateway integration, database optimization, and hardware/IoT integration. Proven leadership in mentoring development teams, establishing code-quality standards, and owning end-to-end feature delivery from architecture to deployment. Adept at translating complex business requirements into reliable, maintainable systems while driving performance, security, and scalability. Passionate about building robust, future-ready backend systems and contributing to high-performing engineering teams.

SKILLS

BACKEND

PHP, Laravel, RESTful API, JSON API, MVC, Service-Oriented Architecture, Sanctum, Passport, JWT, RBAC, Queues & Jobs, Event-Driven Architecture

DATABASE

MySQL, PostgreSQL, Database Design & Normalization, Query Optimization, Indexing, Eloquent ORM, Migrations & Seeding, Redis Caching

INTEGRATIONS

Razorpay, Stripe, Third-Party APIs, Webhooks, Hardware & IoT Integration, SMS & Email Services

FRONTEND

Laravel Blade, Livewire, HTML5, CSS3, Tailwind CSS, Bootstrap, JavaScript (ES6+), jQuery, AJAX, React

DEVOPS & CLOUD

Git, GitHub, GitLab, CI/CD Pipelines, Docker, Linux Server Administration, Microsoft Azure, cPanel, Nginx, Apache, Deployment Automation, SSL & Server Hardening

PRACTICES

Code Review, SOLID Principles, Design Patterns, PHPUnit, Postman, Swagger, Agile, Scrum, Mentoring & Team Leadership

LANGUAGES

English, Malayalam, Hindi

WORK EXPERIENCE

D-FINE DIGITAL LLP — Kottakal

Jan 2024 – Present

PHP Laravel Developer

- Lead backend engineer for fintech and enterprise applications, owning architecture, code quality, and end-to-end delivery of scalable Laravel modules.
- Architected and shipped secure, well-documented RESTful APIs consumed by web and Android clients, enforcing consistent contracts and versioning.
- Designed and integrated payment-gateway workflows (transaction processing, reconciliation, idempotency, and failure handling) with a focus on security and reliability.
- Built real-time hardware/IoT device integration for live data communication between physical devices and cloud services.
- Mentored junior developers through code reviews, pair programming, and technical guidance; established coding standards and best practices across the team.
- Drove performance optimization, query tuning, and debugging initiatives that improved response times and stability of production systems.
- Collaborated cross-functionally with frontend, mobile, QA, and product teams to deliver complex features on schedule.

PHP Laravel Developer

- Engineered ERP-based web applications using Laravel and Core PHP, delivering robust backend services for complex business workflows.
- Designed and maintained REST APIs powering core business modules, ensuring reliability and clean data contracts.
- Developed full-stack features using Laravel Blade, integrating backend logic with responsive frontend UI.
- Configured cloud services and CI/CD deployment workflows on Microsoft Azure, streamlining release cycles.
- Partnered with QA and frontend teams to maintain high-quality, stable production releases.
- Optimized database queries and refactored legacy modules to improve maintainability and performance.

KEY PROJECTS

Finkey — HRMS & Workforce Management Platform

Laravel, MySQL, REST API, Sanctum, Biometric/IoT Integration, Mobile API

- Architected the complete backend for an enterprise HRMS handling employee management, payroll, attendance, leave, performance, asset, and task/project modules.
- Integrated biometric device data synchronization and geofencing for real-time attendance tracking across branches.
- Designed role & permission management (RBAC), shift/holiday scheduling, and automated payroll calculation workflows.
- Built REST APIs for web and mobile applications, with queue jobs for notifications and scheduled report generation.

SkilzHub — Digital Learning & Training Platform

Laravel, MySQL, REST API, Payment Integration, Queue Jobs, Email Automation

- Developed backend for an education platform managing student admissions, courses, batches, internships, certifications, and placement assistance.
- Implemented certificate verification APIs, attendance system, and student/trainer dashboard APIs.
- Integrated payment gateway for course fees and automated email notifications for admissions, events, and certification.
- Built admin panel and CMS backend with optimized database design and full API documentation.

ServeEazy — Repair Shop Management Software

Laravel, MySQL, REST API, SMS/Email Integration, CRM, Invoice & Billing

- Engineered a multi-tenant repair shop management platform for mobile, laptop, electronics, and watch service centers.
- Built repair ticket workflow, technician assignment, job status tracking, and customer CRM APIs.
- Implemented inventory & spare parts module, invoice generation, payment processing, and SMS/email notifications.
- Designed user roles & permissions, API security, and performance-optimized reporting for multi-user access.

EDUCATION

Eranad Knowledge City — University of Calicut

2020 – 2023*BSc Computer Science*
