PROFESSIONAL SUMMARY

Full-Stack PHP/Laravel Developer with 2+ years of experience building scalable web applications, RESTful APIs, fintech platforms, HRMS, ERP, enterprise systems, and business applications. Strong expertise in PHP, Laravel, MySQL, REST APIs, JavaScript, React, Livewire, Laravel Blade, payment gateway integration, IoT/device integration, authentication, RBAC, database optimization, and responsive web development. Experienced in end-to-end application development including architecture, API development, database design, third-party integrations, performance optimization, debugging, deployment, and production support.

TECHNICAL SKILLS

Backend: PHP, Laravel, RESTful APIs, JSON API, MVC, Service-Oriented Architecture, Sanctum, Passport, JWT, RBAC, Queues, Jobs, Events, Background Processing

Frontend: HTML5, CSS3, JavaScript ES6+, React, Laravel Blade, Livewire, Tailwind CSS, Bootstrap, jQuery, AJAX, Responsive Web Design

Database: MySQL, PostgreSQL, Redis, Database Design, Database Normalization, Query Optimization, Indexing, Caching

Integrations: Razorpay, Stripe, Payment Gateway Integration, REST APIs, Third-Party APIs, Webhooks, SMS APIs, Email Services, Hardware Integration, IoT Integration

DevOps and Cloud: Git, GitHub, GitLab, Docker, CI/CD Pipelines, Microsoft Azure, cPanel, Apache, SSL, Server Hardening, Linux

Development: Authentication, Authorization, Role-Based Access Control, API Versioning, Validation, Security, Performance Optimization, Debugging, Code Review, Scalable Architecture

PROFESSIONAL EXPERIENCE

Dfine Digital Solutions

Malappuram, India

Full Stack Developer

Nov 2024 – Present

- Lead full-stack development of scalable fintech and enterprise applications using PHP, Laravel, MySQL, JavaScript, HTML, CSS, and Bootstrap, owning application architecture and end-to-end feature delivery.
- Architect and develop secure RESTful APIs for web and Android applications, implementing authentication, authorization, validation, API versioning, role-based access control, and reliable data processing.
- Design and integrate payment gateway workflows, real-time IoT/device communication, webhooks, background jobs, notifications, and complex business workflows for enterprise applications.
- Optimize application performance through MySQL query tuning, indexing, caching, frontend optimization, reusable Laravel architecture, and production debugging.
- Develop maintainable backend services using Laravel MVC, service-oriented architecture, queues, jobs, events, and reusable components while following coding standards and secure development practices.

Natmco Solutions

Malappuram, India

Software Developer

Sep 2023 – Nov 2024

- Developed and maintained scalable backend applications using PHP, Laravel, MySQL, and RESTful APIs with emphasis on clean architecture, security, performance, and maintainability.
- Built secure REST APIs for web and Android applications, implementing authentication, authorization, validation, API versioning, and structured data processing.
- Developed payment gateway integrations, real-time IoT/device communication, background jobs, notifications, and complex business logic for enterprise applications.
- Designed database structures and optimized MySQL queries, indexes, and backend workflows to improve application performance and reliability.
- Debugged production issues, implemented application fixes, performed code reviews, and contributed to Laravel architecture and development standards.

KEY PROJECTS

Finkey – Multi-Tenant HRMS & Payroll Management Platform

PHP, Laravel, MySQL, REST API,

Livewire, Filament

- Developed a scalable multi-tenant HRMS platform covering employee management, branches, departments, attendance, leave, shifts, payroll, and workforce operations.
- Built biometric attendance integration with real-time synchronization, GPS/geofencing, shift management, over-time calculation, attendance regularization, and workforce tracking.

- Designed payroll and salary calculation workflows covering salary structures, allowances, deductions, overtime, leave, bonuses, advances, loans, and automated salary slips, custom permissions , authentication.

ServeEazy – Repair Shop Management Platform

PHP, Laravel, MySQL, REST API, JavaScript

- Developed a multi-branch repair shop management platform supporting job management, ticketing, billing, customer management, inventory, and workflow automation.
- Built modules for spare-parts management, invoicing, accounting, cash flow, reporting, and real-time repair job status tracking.
- Implemented role-based multi-user access, SMS/email notifications, customer communication workflows, and optimized backend services for high-volume operational data.

Dum Handi Biryani – Restaurant Ordering & Management Platform

PHP, Laravel, MySQL, REST

API, Livewire

- Developed a restaurant management and ordering platform supporting online orders, dine-in operations, table reservations, menu management, catering, and multiple locations.
- Built Laravel backend modules and RESTful APIs for order processing, customer management, billing, reservations, order tracking, and restaurant operations.
- Optimized Laravel application performance and MySQL queries while implementing secure authentication, validation, role-based access, and scalable business logic.

Additional Web Projects:

Kuza – Responsive business website (kuza.co.in);

Huebond – Responsive corporate website (huebond.com);

SkilzHub – Education and training platform (skilzhub.org).

EDUCATION

Bachelor of Science in Computer Science

2023

University of Calicut

Software Developer Certification

2023

KKM SOFT PVT
